Re: Last Office Action Summary from the date of 03/26/2004

US Pat. Appln. S/N 08/894,211 - (PCT National Stage, filed July 30, 1997)
"EXTENDIBLE AND RETRACTABLE ELEMENTS AND VARIOUS USES
FOR THE ELEMENTS"

Our File: 0878

Dear Mr. Walsh,

This is not my official response to your last Office Action Summary.

This is a response to your decision of a new procedure of election of species - after 8 years of all kind of wrong procedures made by the USPTO.

After receiving from you the last Office Action Summary from the date of 03/26/2004 I tried to call you immediately by phone but just Mr. Anthony Knight, the Supervisory Patent Examiner was available.

I told him about the last Office Action Summary that I have received and he said and agreed with me that after 8 years of this procedure it is not proper to start now a new procedure of election of species and that a procedure like that had to start in the beginning - 8 years ago.

Mr. Knight called it "improper" and offered me to ask you in this response to consider again this last Office Action Summary.

I am sending you this application so you can consider again this Office Action Summary.

Please make
response official
Non responsive

I hope you will understand me.

After going through all the things that I have been going with my former patent lawyer Edward Langer who decieved me and after 8 years of this rong procedures - I feel that it is unfair what is happening to me in this patent application procedures.

Respectfully submitted,

Mordechai Hammer
